

What has the team accomplished since the last time you met with the instructional team?

The team successfully gained access to the organization's social media accounts. We also connected with pod makers and changemakers to support social media storytelling efforts. Our team began researching analytics tools and methods, and we explored the best social media trends that resonate with our target audience. Additionally, we have started crafting a comprehensive strategy that we plan to propose to Cedric.

What is the team hoping to accomplish in the next two-week sprint?

During the next two-week sprint, the team hopes to gather research insights and collect graphics for potential social media remodeling ideas. We aim to draft and send our proposed strategy to Cedric to receive his feedback. The team will also begin working on graphics and execution strategies, which includes conducting further relevant research. In preparation for our upcoming meeting, we have started drafting questions and creating a detailed agenda. Finally, we plan to create a preliminary analytics document that includes current social media data to establish a baseline for future comparisons.

What barriers or challenges has the team encountered?

The team initially faced difficulties accessing all the social media accounts. However, those issues have now been resolved, and we are ready to begin our research and content development in full.
